

iPoint Tutorial – Create your own restaurant guide

(Version iPoint 0.9)

1. Create a new project

Select menu “File” -> “New Project...” and open the “New Project” dialog.

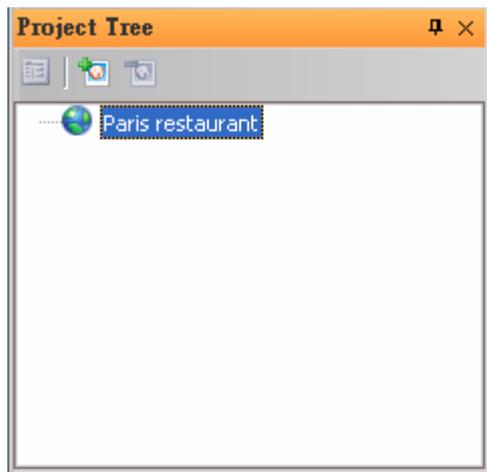

Type in the project name, i.e. “Paris Restaurant.”

Select “restaurant” in the “From Template” field.

Press the OK button to create a new project.

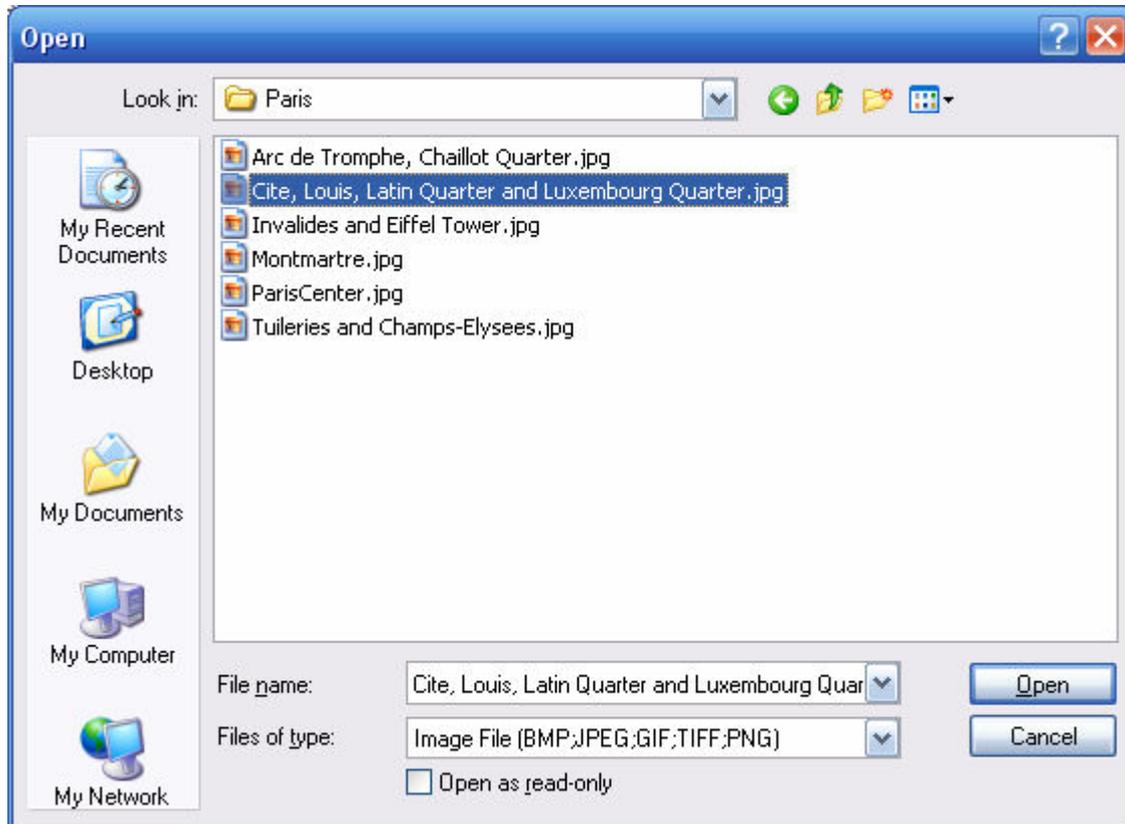

Then, you can see “Paris restaurant” in the “Project Tree” window.

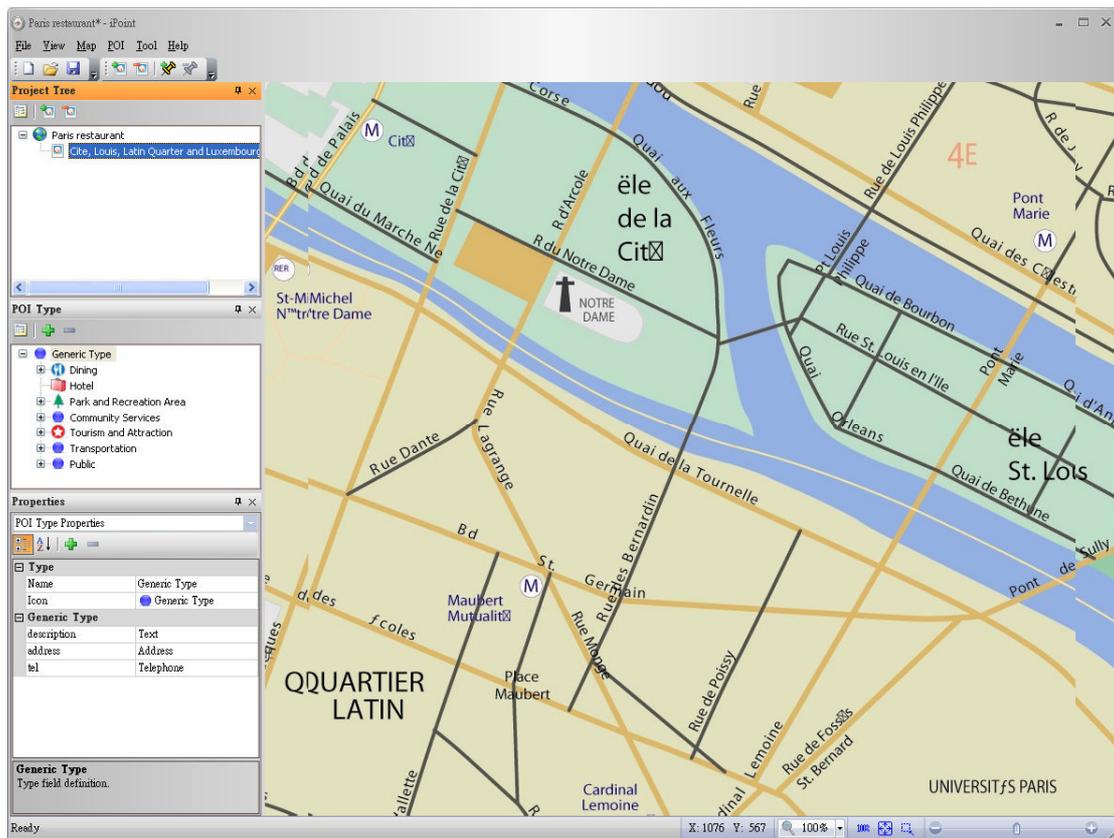

2. Inserting a Map

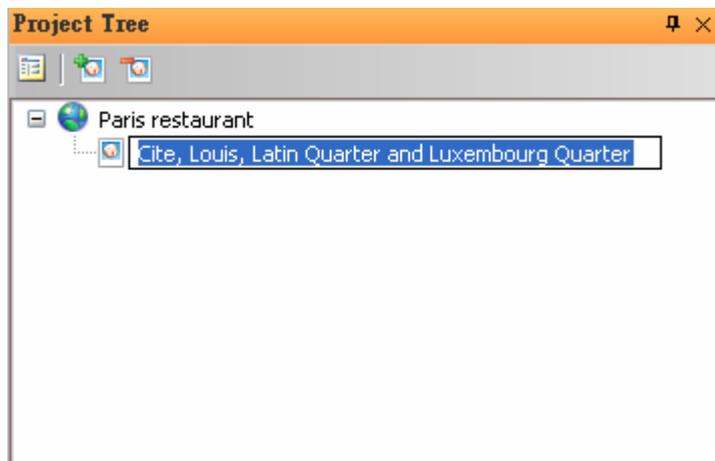

2.1 Select “Map” -> “Insert Map...” and choose an image file as a map. iPoint supports all types of image files (bmp, jpg, png, gif, tiff).

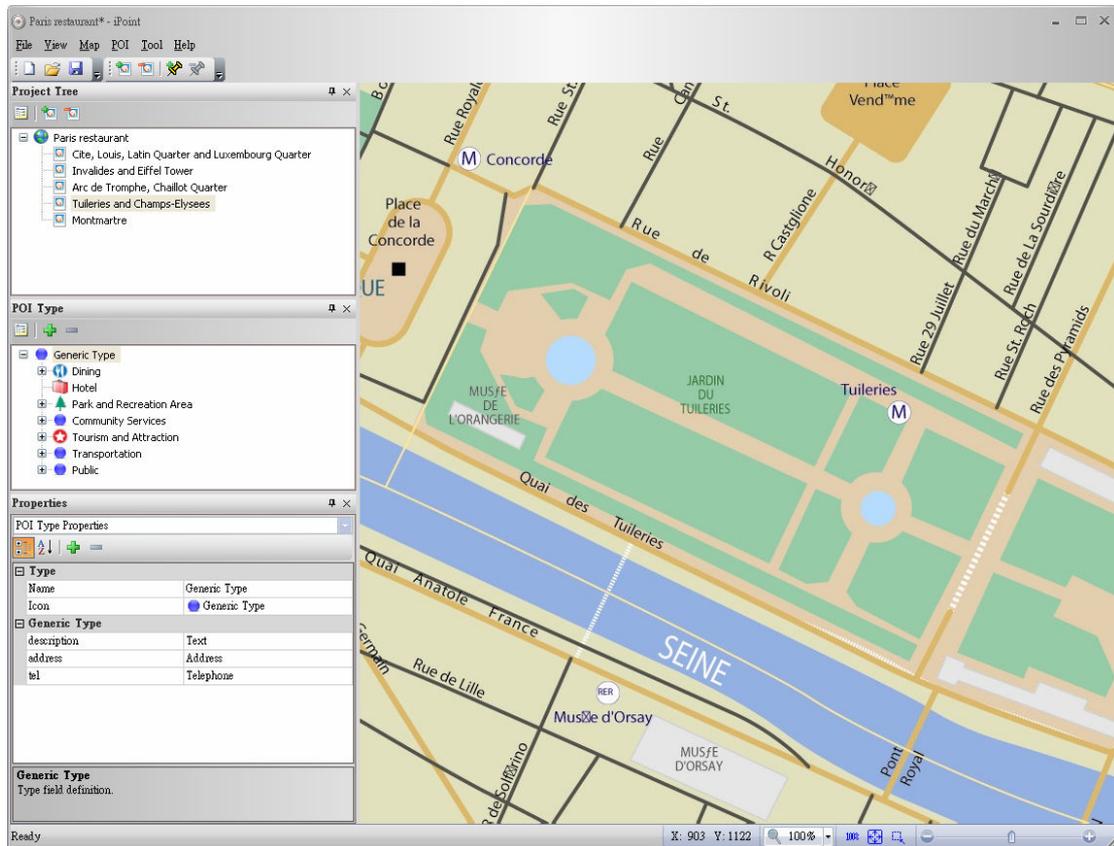

Press the OK button, then iPoint will load the map

2.2 The default map name is the image file name. If you want to rename it, just simply click on the map name in the “Project Tree” window and type the new map name.

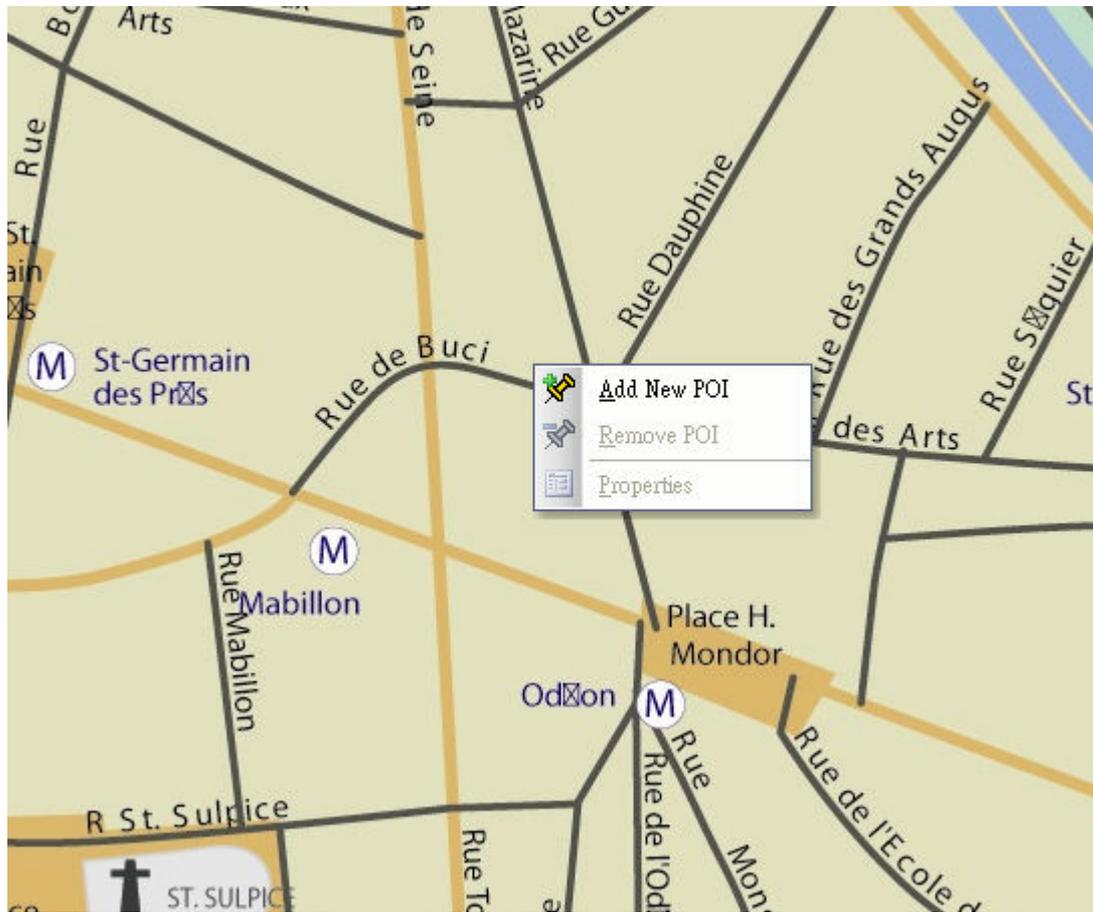

2.3 You can add multiple maps in one project. You can switch the map by selecting them on the “Project Tree” window.

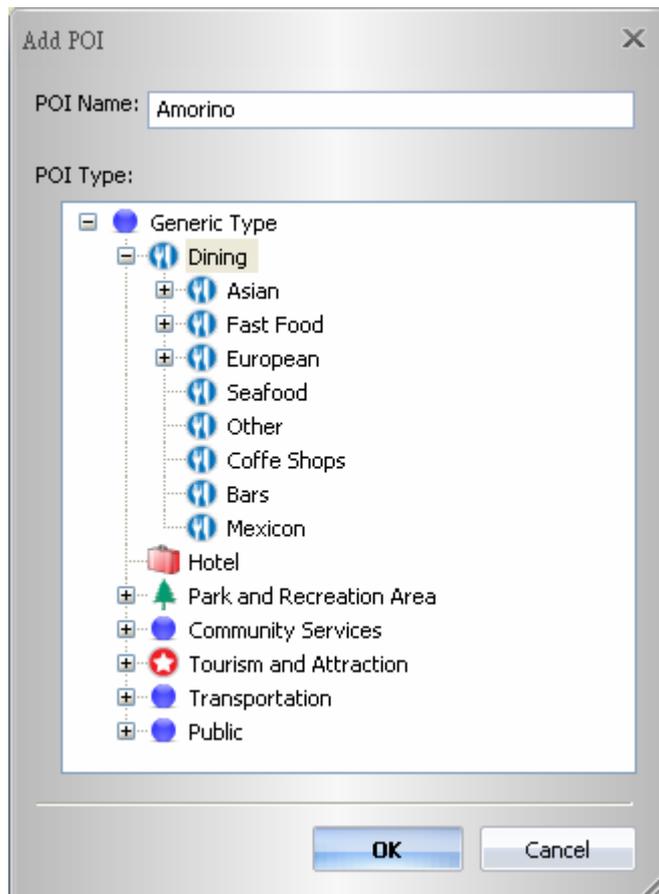

2.4 Any image file can be the source of your map. You can screen capture from web sites like “Google Map” or “Map Quest”. Also, you can scan in a real map and save it as an image file. Even a digital camera’s photo can be used as the map.

3. Add New POIs

3.1 Right click on the place where you want to add the new POI, and select “Add New POI” menu button.

Fill in the POI name and select the POI type in the “Add POI” dialog box.
Press the OK button to create a new POI.

4. Edit POIs

Select the POI you would like to edit, and in the “properties” window, you will see the various fields of the POI. Type the information into the corresponding columns.

5. Save project and open project

Select menu "File" -> "Save Project" will save the project.

Select menu "File" -> "Open Project" will bring up the project manger.

Select the project you are going to open and press "Open" button.

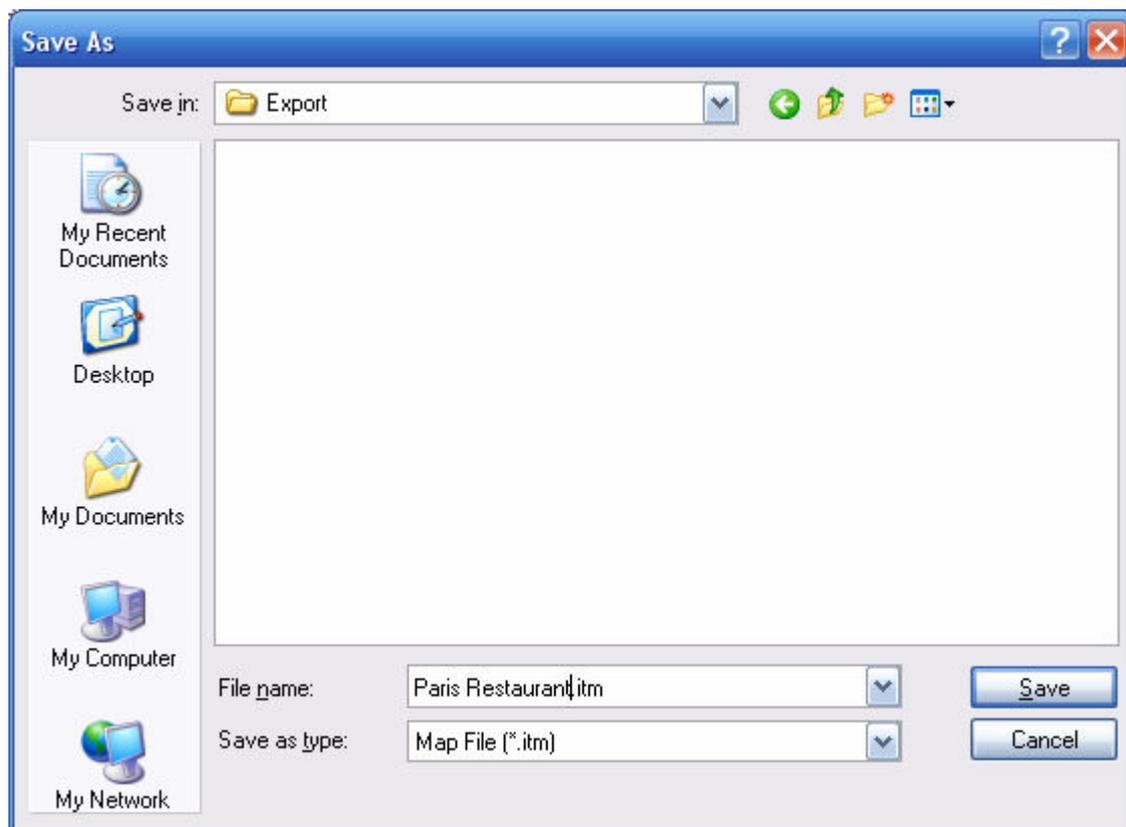

6. Sharing your project with friends. (Exporting and Importing your project)

The projects you have created are saved in the workspace and can be managed from the “Project Manager” window. If you want to share your project with friends, you can export the project to a file and email it. When your friends receive the file, they can open iPoint and import it.

6.1 Exporting your project.

Select the menu “File” -> “Export Project...” and give a file name.

Press “Save” button to save it.

6.2 Send the file to your friends, or post it on <http://www.pocketwander.com> to share with others.

6.3 When your friends receive the file, they can open iPoint, select menu “File” -> “Import Project...” The project will be copied to their workspace and show on their “Project Manager” window.
